THE UNSEEN ADVANTAGE

The design excellence of Virco's custom upholstered stack chairs goes beyond the naked eye. While their strong, tubular steel frames and attractive upholstery are plain to see, there's something more you should know about our chairs. Premium upholstery foam gives them a long-term competitive edge.

While upholstery foam quality is measured by a number of criteria, the most important are density and I.L.D. (indentation load deflection) and the relationship between them. Simply put, density and I.L.D. work together to determine both the firmness and durability of upholstery foam. With that in mind, we've outlined the "foam facts" that separate Virco chairs from the competition:

Premium 3.0 density upholstery foam with a high I.L.D. rating

1. Virco's premium 3.0 density upholstery foam with a high I.L.D. rating provides longer-lasting seating comfort when compared to inferior "dual-density" foams, which break down more quickly.
2. Unlike competing composite foams that "bottom out" and leave chairs with unsightly crushed corners, the uniform consistency of our premium upholstery foam helps Virco seat cushions effectively maintain their appearance and resilience despite heavy, high-traffic use.
3. Because our foam makes for greater product longevity and seating support, Virco upholstered stack chairs with premium foam give you a better furniture value for your money.

In light of the above, premium foam is clearly a critical component in the construction of upholstered chairs. Although this fact may not be evident when they're brand new, a few years of heavy use will separate superior chairs from all the rest. After a while, you'll notice that the seats of some manufacturers' chairs are buckling, sagging or bulging, while others, like Virco's, have retained a firm, fresh appearance. Ultimately, the difference is reducible to foam.

Now you know why premium upholstery foam is so important. It gives you **the unseen advantage** of Virco's commitment to authentic quality.

8900 Series Upholstered Stack Chair Features

Frames are constructed of 7/8" square, heavy-gauge tubular steel.

A 7/8" square, heavy-gauge tubular steel cross member is welded to the frame for enhanced seat strength.

Optional welded-on ganging device.

Stack bars welded to the legs help protect the upholstery of stacked chairs, while helping to align the stack.

Plastic stack bumpers help protect frames when chairs are stacked.

A 5/8" square, heavy-gauge tubular steel H-brace is welded to the rear legs.

Custom 8900 chairs with steel-base swivel glides have a molded plastic collar to help protect upholstery when chairs are stacked.

Standard 8900 chairs have plastic rocker glides.

DESIGNER “EVERYWHERE” CHAIRS

For adaptable, stylish seating that works in a wide range of hospitality settings, Virco’s “everywhere chairs” give you a diverse range of choices.

Conceived by internationally renowned sculptor Charles Perry, the Virtuoso® Series features a patented articulating back for sustained comfort. Four models are available with plastic or upholstered seats and backs – and with or without self-skinned urethane arms – to coordinate with your interior décor.

With a taller, wider shell that incorporates a lively, resilient backrest, Virco’s newly-introduced Sage™ Series gives you three additional seating choices. Designed by Peter Glass and Bob Mills, these remarkably comfortable models include two 4-leg chairs – one of which has a 19” seat height that’s ideal for taller people – and a great-looking cantilever chair.

Virco’s best-selling ZUMA® collection provides three more selections to our “everywhere chairs” line-up. Thanks to the efforts of the Glass/Mills team, ZUMA earned a coveted Best of NeoCon® Editors’ Choice Award at America’s most prestigious contract furniture trade show. Like the Sage Series, ZUMA has an elegantly cantilevered sled-based model and a traditional 4-leg chair; in addition, ZUMA offers a relaxing cantilevered rocker.

Richard Holbrook’s I.Q.® Series products come with a visually balanced, ergonomically contoured seat. From its gentle lumbar curve that promotes correct posture to a waterfall seat front that’s easy on your legs, the I.Q. seat delivers exceptional support.

VIRTUOSO® SERIES

DESIGNED BY
CHARLES PERRY

Charles Perry's initial career direction in architecture eventually turned to large-scale public sculpture. Continuum, his most prominent work, is located at the entrance to the National Air and Space Museum in Washington, D.C. Furniture design is another of Perry's vocations. His recent creation, the Virtuoso® Series, combines the convenience of a versatile, hard-working stack chair with the comfort of a patented, articulating back. "The Virtuoso is a 'quiet' chair," said Perry, "Unobtrusive; stately - if you will - not at all jazzy. Virtuoso is intended to stay in the background and quietly let the rest of the ambience blossom."

SAGE™ SERIES

DESIGNED BY
PETER GLASS
& BOB MILLS

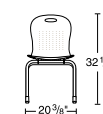

By incorporating and enhancing many of the ergonomically beneficial details with which they endowed Virco's best-selling ZUMA® products, Glass and Mills gave the new Sage™ Series a larger chair shell that's both taller and wider. The responsive Sage backrest, in the words of Peter Glass, "moves with you and supports you with extraordinary comfort." Another new detail involves the smoothly rolled Sage perimeter edge, which, as Bob Mills said, "significantly increases the user's comfortable range of motion." "Sage has a modified lumbar curve which provides excellent support for a wider variety of body types," Mills continued. "We believe taller-than-average people, as well as average-sized users, will really enjoy using Sage furniture."

ZUMA® SERIES

DESIGNED BY
PETER GLASS
& BOB MILLS

Peter Glass and Bob Mills brought exceptionally well-focused insights to the ZUMA® project. As the author of Virco's Plateau® and Lunada® lines, Glass expertly grasped and communicated the sense of style and support so eloquently expressed by ZUMA. And Mills, drawing on extensive furniture design and construction experience, provided a wealth of detailed, nuanced contributions that solidified ZUMA's affordable price point while simultaneously raising its ergonomic and aesthetic level. The end result of their collaboration is a remarkably cool, comfortable and affordable product collection, validated – with an exclamation point – by an exclusive Best of NeoCon® 2004 Editors' Choice Award at America's most esteemed contract furniture trade show.

I.Q.® SERIES

DESIGNED BY
RICHARD HOLBROOK

Through extensive work with international clients, Richard Holbrook approaches design as a balance of form and function. "The wonderful thing about designing furniture," he said, "and especially seating, is that while a chair should certainly possess a unique visual identity - a 'style' - chairs are fundamentally very practical, physical products. That's why the shapes, materials, finishes, movement and appearance are inseparable elements of any chair design. If all these aspects work together in balance and harmony, a chair becomes more than just a piece of 'furniture'." Fittingly, the I.Q.® Series achieves this harmonious seating balance.

CAFE TOPS AND BASES

Virco's Lunada® Series table bases, conceived by award-winning designer Peter Glass, bring a unique combination of function, convenience and style to restaurant, hospitality and related applications.

Unlike other bases, Lunada's functionally innovative notched column locks securely into its upper foot, eliminating needless top rotation. Easily assembled Lunada bases also feature durable ABS plastic glides that readily adjust in a 1/2" range to help level tables on uneven floors. Optional glide kits in a rainbow of attractive colors let you customize Lunada bases to coordinate with a full spectrum of interior environments.

Additional Virco bases include two popular 664 Series models with sturdy steel columns and cast aluminum feet, as well as seven traditional cast iron models in a variety of round, cross-shaped and bi-point foot configurations.

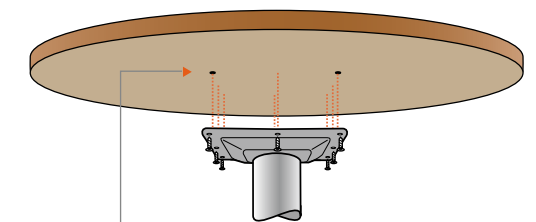

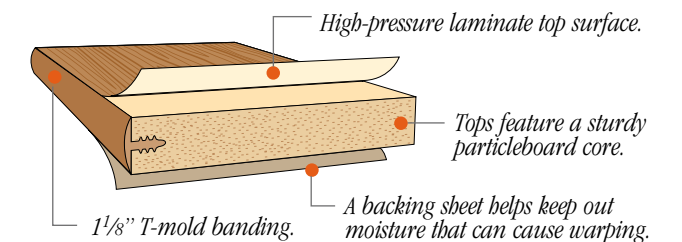

Twelve Virco cafe tops give you a range of alternatives for complementing your table bases. Round and rectangular models can be ordered with standard or custom laminates; selected items are available through our Quick Ship program.

FOLDING TABLES - LIGHTWEIGHT & TRADITIONAL

When you want the best commercial-grade lightweight folding tables on the market, consider the following important facts about Virco's Core-a-Gator® line.

The Core-a-Gator's patented extruded aluminum frame makes it superior to lightweight tables that rely on wooden inserts for structural strength. Because our aluminum frame is far stronger than any wood and has better mechanical properties, it's more easily shaped into forms that match the contours of round or crescent-shaped tables.

The Core-a-Gator frame delivers full perimeter reinforcement, enabling round and crescent shapes to perform as well or better than rectangular tables, a claim no other manufacturer can make.

Virco's patented conical "honeycomb" core provides uniform support and many times more surface area for extensive, secure bonding to the top's outer skins than competing tables. Experience has shown that other tables with a latticework structure tend to fail much earlier than Core-a-Gator models when subjected to repetitive loading that simulates typical field use.

Thanks to Virco's patented top design, Core-a-Gator tables have what it takes to deliver consistent, reliable performance in real-world conditions. They're perfect for use wherever folding tables are typically employed. And because they're quick and easy to use, we conclude that: Core-a-Gators set the standard of excellence for lightweight folding tables.

As a complement to the Core-a-Gator line, Virco offers traditional rectangular and round folding tables. We carry two adjustable leg models for applications requiring variable table top heights. In addition, our popular mobile folding tables - with or without attached seating - expand your furniture choices.

FOLDING TABLES

Savannah
International Trade
& Conv. Cntr.

Paul O'Connell,
Operations Manager

We're very happy with our Core-a-Gator® folding tables. They're easy to set-up, easy to maintain, and after almost two years of heavy use, not one of the tables has broken down.

Our working relationship with Virco is outstanding. The tables and chairs we purchased from them have performed as advertised. Everything that was promised was delivered.

This corner unit table has a sturdy cast iron base that detaches from the table bottom for storage.

FOLDING TABLES

The Core-a-Gator® Advantage

Shock Absorbent ABS Plastic Corner Bumper
Sturdy, reinforced corner construction resists denting, splintering and related damage.

Edge Mold Bumper
An inner ABS edge mold bumper gives the table added protection.

Durable ABS Plastic Top
Strong, lightweight ABS plastic provides a long-lasting, color-fast top surface.

Unique Corrugated Center
A patented core design unites first-rate strength with convenient, lightweight utility.

Apron Stacking Bumper
An ABS bumper in each corner helps protect the tops of stacked Core-a-Gators.

Durable ABS Plastic Bottom
Like its top, the Core-a-Gator bottom is made for rugged, reliable performance.

Strong Adhesive Bond
Extensive bonding areas between top and bottom surfaces deliver superior durability.

Decorative Edge Banding
The Core-a-Gator's attractive edge banding stands up to scuffing and scratching. A generous edge mold design allows tops to accept standard table skirt clips.

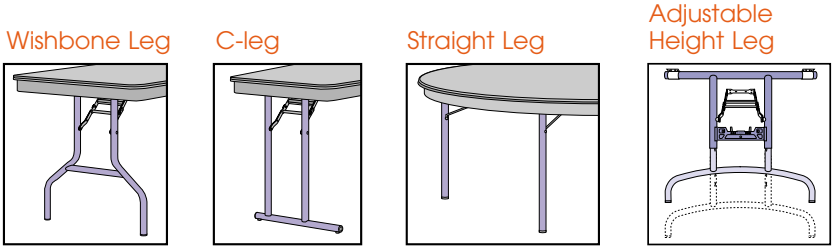

Aluminum Leg Attachment Plates
Legs are anchored to the underside of the table top through multiple aluminum plates.

Aluminum Frame
A lightweight, extruded aluminum frame adds strength and support to the table.

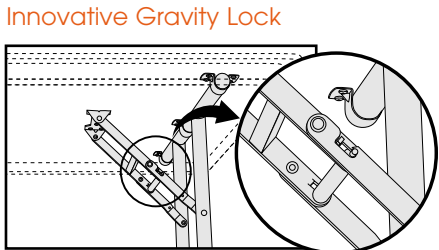

The storage truck's open end is raised so tables lean toward rails for security during transit.

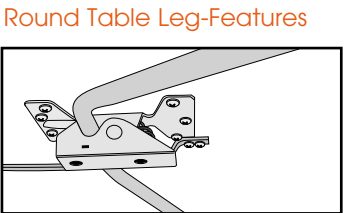

HTT8 and HRTT1
See page 47 for more information on storage trucks.

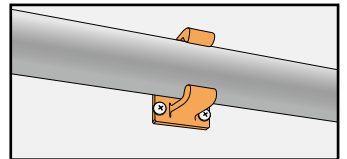

Core-a-Gator Leg Features
All 24", 30" and 36" wide Core-a-Gator® models are equipped with Virco's heavy-duty wishbone-style legs. Narrower 18" tables come with strong, high-performance C-legs. Round Core-a-Gator models feature a sturdy straight leg design. Adjustable height legs are featured on half-round models and two popular rectangular shaped models. Each of these leg styles gives you more room to comfortably stretch your own legs beneath Core-a-Gator tables.

Locking Mechanism for Wishbone and C-Leg Designs
Virco's patented locking mechanism adds strength, security and convenience to our wishbone and C-leg designs. When setting up tables, simply unfold each leg with an outward motion to extend the hinges and engage the gravity-lock pin. To return legs to a folded position, set the table on its side and push the gravity-lock pin toward the table top. This will disengage the pin from its locked position, allowing you to easily complete the folding process.

Round Core-a-Gator tables have a convenient spring clip mechanism that securely locks unfolded legs in position (top). Folded legs are held in place by injection-molded retention clamps for safer movement and storage (bottom).

Designed for Stacking
All Virco leg styles are designed to fold neatly under the table profile to allow for easier stacking. Stacking bumpers protect top surfaces when tables are stacked.

Service Life Recommendation
In order to extend the torque life of mobile bench tables, mobile stool tables and DuoFold tables with torsion bars on pages 40 and 41, Virco recommends that customers store their tables in a upright position when not in use.

Medium Oak

Grey Nebula

Frame: Chrome

See top of page 41 for information on optional Sure Edge® treatment.

To view larger color swatches, see page 59.

Mobile Folding Table Features

All mobile tables are protected with T-mold banding.

AE - Virco's optional Sure Edge® composite edge finish is available in 13 colors for all mobile folding tables (models beginning with "M") on pages 40 and 41. To order tables with a Sure Edge finish, add AE to the end of the model number.

Color options

Black Moonstone Adobe Eclipse Fusion Maple Squash Red

Apple Cucumber Forest Green Navy Blueberry Purple Iris

Clearance between table tops helps avoid pinched fingers on stool, bench and DuoFold tables.

Tables feature a safety device that helps avoid pinched fingers during set-up. The device must be manually released before the table can be completely unfolded

Every Virco bench and stool table has an individual locking mechanism designed to hold it in place when in use. These models are also equipped with an up-lock device that engages when the table is folded.

Virco's bench tables and stool tables are listed by Underwriters Laboratories Inc. (UL). Samples of these products have been evaluated by UL and meet the applicable UL standards for safety.

MULTI-PURPOSE

*River Center Convention Center
Davenport, IA*

MULTI-PURPOSE FURNITURE

Virco's multi-purpose chairs and storage equipment expand your furniture options.

We offer four plastic and two upholstered stack chair models that deliver instant seating solutions. If you prefer folding chairs, we've got a selection of styles, including two deluxe models with extra-thick padded seats featured on page 53.

In addition to multi-purpose furniture, hospitality venues rely on hard-working storage equipment. That's why we offer a complete line of trucks and dollies that move and store a range of Virco tables and chairs. For convention centers, arenas and related facilities, we also have heavy-duty, large-scale storage units that work with a selection of our furniture items as indicated on pages 54 and 55.

MULTI-PURPOSE

Seating

8802
A 7/8" steel frame and two 3/4" underseat cross braces provide a firm base of support for padded, upholstered model 8802 Comfort Stacker™ chairs.

-  Sedona Sailor fabric
-  Sedona Ruby fabric
- Frame: Char Black

i For information on Virco's upholstery program or to view larger color swatches, see page 58-60.

8806
Virco's model 8806 Comfort Stacker™ chairs offer the same construction features as our model 8802, while also giving you the convenience of self-skinned urethane armrests.

-  Sedona Sailor fabric
-  Sedona Ruby fabric
- Frame: Char Black

4100
As their name suggests, model 4100 Ultrastack® chairs form tight, space-saving stacks that are readily transportable on optional dollies.

- Option: Welded-on ganging device
- 
- i* Additional colors are available as Designer colors. To view larger color swatches and color codes, see page 59.
- Frame: Chrome

9018
With over 47,500,000 units sold, Classic Series™ chairs deliver reliable seating performance in thousands of diverse venues from coast to coast.

- Option: Welded-on ganging device
- 
- i* Additional colors are available as Designer colors. To view larger color swatches and color codes, see page 59.
- Frame: Chrome, Silver Mist or Char Black

2018
Model 2018 chairs feature a smooth polypropylene shell with a comfortable waterfall seat front. They're easy to stack and move with optional Virco hand trucks.

- Option: Welded-on ganging device
- 
- i* Additional colors are available as Designer colors. To view larger color swatches and color codes, see page 59.
- Frame: Chrome, Silver Mist or Char Black

Metaphor®
With an ergonomically contoured one-piece polypropylene shell, Metaphor® chairs give you dependable performance in a wide range of settings.

- 
- i* Additional colors are available as Designer colors. To view larger color swatches and color codes, see page 59.
- Frame: Chrome, Silver Mist or Char Black

Folding Chairs

188
A rainbow of fabric upholstery choices brightens the padded seats and backs of our model 188 chairs.

- Option: Ganging device
- 

168
Vinyl-covered seat and back pads are standard on the popular model 168.

- Option: Ganging device
- 

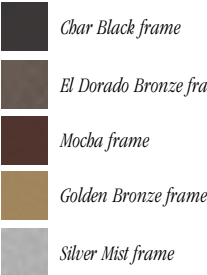

162
For an outstanding value in a basic, budget-priced chair, our model 162 is an excellent choice.

- Option: Ganging device
- 

167
For more intensive applications, model 167 chairs feature an additional rear leg brace.

- Option: Ganging device
- 

U-Shaped Leg Braces
Virco folding chairs feature heavy-gauge U-shaped leg braces that are riveted to the frame for extra strength.

A Char Black frame is standard on all Virco mobile storage equipment.

**Safe Hand Truck Capacities: Unlike storage carts, which support the weight of the furniture entirely with structural steel, hand trucks rely on the strength of the operator to balance the load. For this reason, there is no single "safe capacity" for hand trucks. Conditions such as the size and strength of the operator, the weight of the furniture being moved, and the presence or absence of thresholds, ramps or slick surfaces can all affect the capacity of hand trucks. We recommend starting with small, easily handled loads and adding one or two pieces of furniture at a time to determine the safe capacity for each set of conditions. It's always better to make a few extra trips than to risk injury to yourself or others by overloading a hand truck. Remember, loaded hand trucks can be dangerous! Use common sense. Please see page 61 for Virco's "Guidelines for Stacking and Moving Furniture".*

MULTI-PURPOSE

CONVENTION & ARENA FURNITURE

When it comes to outfitting convention centers and auditoriums, Virco leads the way. For almost half a century, we've provided a variety of seating solutions for leading venues from coast to coast, including:

<i>Alario Center</i>	<i>Gretna, LA</i>
<i>Alltel Arena</i>	<i>Little Rock, AR</i>
<i>American Airlines Arena</i>	<i>Miami, FL</i>
<i>Anaheim Convention Center</i>	<i>Anaheim, CA</i>
<i>Arlington Convention Center</i>	<i>Arlington, TX</i>
<i>Broward County Convention Ctr.</i>	<i>Ft. Lauderdale, FL</i>
<i>Century II Convention Center</i>	<i>Wichita, KS</i>
<i>Claremore Expo Center</i>	<i>Claremore, OK</i>
<i>Delta Plex</i>	<i>Walker, MI</i>
<i>E Center</i>	<i>Salt Lake City, UT</i>
<i>First Union Center</i>	<i>Trenton, NJ</i>
<i>Georgia Maritime Center</i>	<i>Savannah, GA</i>
<i>Georgia World Congress Center</i>	<i>Atlanta, GA</i>
<i>Green Lake Convention Center</i>	<i>Green Lake, WI</i>
<i>Harborview Convention Center</i>	<i>Clearwater, FL</i>
<i>Hartford Civic Center</i>	<i>Hartford, CT</i>
<i>Honolulu Convention Center</i>	<i>Honolulu, HI</i>
<i>Houma-Terrebone Center</i>	<i>Houma, LA</i>
<i>Jacob Javits Center</i>	<i>New York, NY</i>
<i>Los Angeles Convention Center</i>	<i>Los Angeles, CA</i>
<i>Mark of the Quad Cities</i>	<i>Moline, IL</i>
<i>Mississippi Coast Coliseum</i>	<i>Biloxi, MS</i>
<i>Moscone Center</i>	<i>San Francisco, CA</i>
<i>Myrtle Beach Convention Center</i>	<i>Myrtle Beach, SC</i>
<i>New Orleans Convention Center</i>	<i>New Orleans, LA</i>
<i>Ontario Convention Center</i>	<i>Ontario, CA</i>
<i>Pennsylvania Convention Center</i>	<i>Philadelphia, PA</i>
<i>Phoenix Civic Center</i>	<i>Phoenix, AZ</i>
<i>Reliant Park</i>	<i>Houston, TX</i>
<i>Rialto Theatre</i>	<i>Joliet, IL</i>
<i>Sacramento Convention Center</i>	<i>Sacramento, CA</i>
<i>Statehouse Convention Ctr.</i>	<i>Little Rock, AR</i>
<i>St. Paul Rivercentre</i>	<i>St. Paul, MN</i>

<i>Wisconsin Center</i>	<i>Milwaukee, WI</i>
<i>Worcester Centrum</i>	<i>Worcester, MA</i>

Virco is proud to be associated with these and other venues throughout the industry. When you're ready to furnish your facility, Virco's track record speaks for itself.

The Winning Edge

Successful convention centers and auditoriums rely on teamwork. The daily tasks of set-up, tear-down and timely turnaround require that everyone, from the facility manager to the guys on the arena floor, communicate and cooperate.

Virco understands the importance of working with our customers. That's why we offer you the industry's most complete, comprehensive package of public facilities furniture and storage equipment.

We give you the widest selection of custom upholstered stack chairs and folding chairs on the market. What's more, our family of folding tables provides you with a range of choices in top sizes, thicknesses and core construction. We're especially proud of our patented Core-a-Gator® line, which combines innovative engineering with superior durability in the finest lightweight folding tables money can buy.

In addition to our hard-working furniture alternatives, Virco supplies you with an array of storage equipment. We specialize in the construction of customized storage systems for facilities throughout the country.

More broadly, we also specialize in customer satisfaction. Our computerized layout service can help you optimize both your storage and seating capacities.

At Virco, we know that teamwork's the name of the game. We've got the experience, flexibility and resources to give your team the winning edge.

Stackable Storage

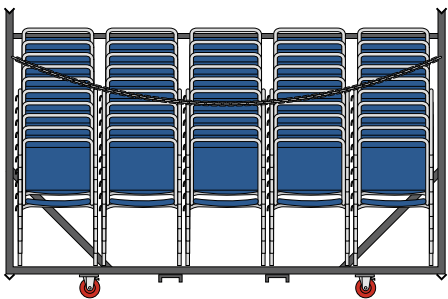

8830SBG Stack Chair

8830SBG chairs are easy to set-up, gang, stack and store.

8830SBG
Our popular 8830SBG is the upholstered stack chair of choice at auditoriums and arenas around the country.

SCT11SU & SCT11KD
See page 54 for more information on large-scale stackable storage.

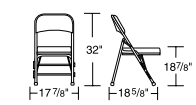

i For information on Virco's upholstery program or to view larger color swatches, see page 58-60.

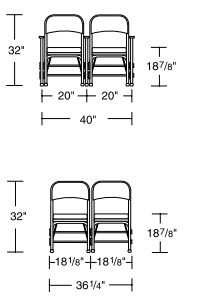

Minimums may apply on certain models and color combinations. See page 61 for more information.

198G and 190G Folding Chairs

198G
Virco's top-of-the-line 198G features an extra-comfortable 21/2" padded seat. You can outfit it with the options that suit the needs of your venue.

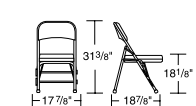

Armrests
Optional arms with urethane pads enhance the seating convenience of the 190G and 198G while also serving as a ganging device.

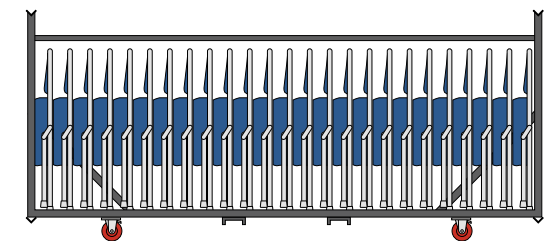

Easy Access
Seats fold up independently to allow easy passage through rows of chairs. An identification plate mounted on the underside of the seat allows chairs to be numbered.

Embossed Backrest
Model 198G folding chairs are available with optional embossed backrests.

190G
With its strong tubular steel frame and enclosed seat pan, the 190G folding chair delivers practical, cost-saving solutions.

SCT19125SU & SCT19125KD
See page 54 for more information on large-scale stackable storage.

San Diego Convention Center
San Diego, CA

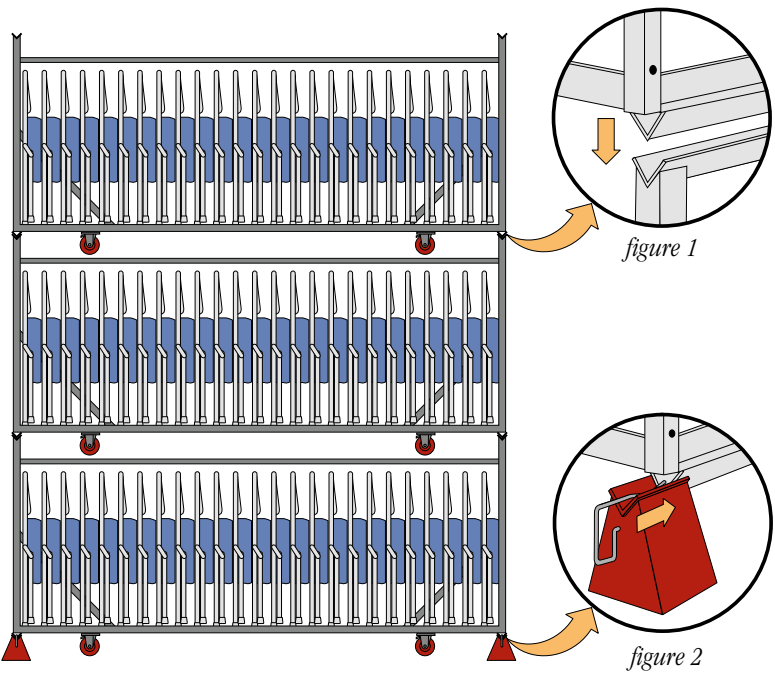

Minimums may apply on certain models and color combinations. See page 61 for more information.

Stackable Storage

For major storage solutions, Virco's SCT11 and SCT19 units provide strong, reliable service. Both of these chair truck systems are built to order for the specific needs of individual facilities. The SCT11SU and SCT11KD handle large-scale stack chair storage for Virco's 8830SBG or 8900 Series models. Welded-on forklift pockets allow SCT11 storage units to be stacked for efficient space utilization with our optional floor support stand system. SCT19 storage units for folding chairs offer you similar performance. These stackable storage trucks help you organize our 198G or 190G folding chairs.

In addition, we carry a full line of stackable storage units for Virco folding tables. Our sturdy TT1872SU, TT1896SU, TT3072SU, TT3096SU and TT57SU table trucks are engineered to withstand the rigors of day-to-day, high-volume use. Each of these chair and folding table storage units can be custom designed to meet the requirements of your venue. Virco has decades of experience in providing custom storage solutions for scores of satisfied customers.

We also offer a computerized service that will help you optimize the space you've allotted for your storage needs. Using the latest Computer Assisted Design (CAD) technology, our Design Engineering personnel can generate sample layouts for your consideration and assist you in your storage planning. For more information, contact your Virco Sales Representative, or call us at 800-448-4726. For international sales call 310-533-0474.

Designed to optimize storage space

Selected Virco storage trucks (models TT57SU, TT1872SU, TT1896SU, TT3072SU, TT3096SU, SCT11SU, SCT11KD, SCT1978KD, SCT1996KD, SCT19125KD, SCT1978SU, SCT1996SU and SCT19125SU shown) may be stacked three-high beneath a twenty-foot ceiling. V-shaped bars on the top and bottom of these storage carts hold stacked units in place (see figure 1). Vertical nesting allows three times the number of chairs to be stored in the same footprint that would otherwise be occupied by a single cart, maximizing the use of vertical storage space.

PLEASE NOTE: Virco's floor support stand system (model SCTSBL) must be used when storage trucks are stacked. This system keeps the weight of stacked units off the casters of the bottom storage truck. When in use, a coupler rod holds each of the system's stands in place (see figure 2).

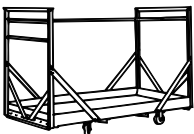

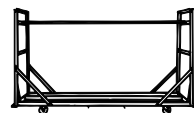

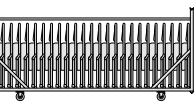

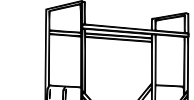

SCTSBL

This system, which must be used when storage trucks are stacked, keeps the weight of stacked units off the casters of the bottom storage truck. The system allows trucks to be stacked up to three high.

Virco's floor support stand system is designed for use with the following storage truck models: TT57SU, TT1872SU, TT1896SU, TT3072SU, TT3096SU, SCT11SU, SCT11KD, SCT1978SU, SCT1996SU, SCT19125SU, SCT1978KD, SCT1996KD and SCT19125KD.

Storage Unit Assembly

The storage unit model numbers listed on this page have either "SU" or "KD" endings. Welded SU models are shipped already "set-up" and require no assembly. By contrast, KD, or "knock-down" units are shipped in component form and do require some assembly prior to use.

		Size (Length x Width x Height)
	Model	For Storing

COLOR SWATCHES

Color Reproduction

Because of the color reproduction variability that may occur in printed materials, Virco recommends that you review actual color before choosing these materials. Swatches with color codes in red are available as sample chips or on swatch cards. Your Virco Sales Representative will be happy to assist you in this process.

Finishes

Standard powder coat finishes are only applicable to the specific Virco products indicated in the current Virco price list. Other products ordered with these finishes are subject to an upcharge and extended lead times. For more information, contact your Virco Sales Representative.

Lead Times and Minimum Orders

Virco always works to fill your furniture order as quickly as possible; in fact, our Equipment for Educators™ catalog includes over 3,000 product, color and finish combinations that have a shipping lead time of 10 to 20 business days, or less.

However, please be aware that the custom items shown in this catalog – featuring special frame finishes, plastic colors or upholstery selections – often require extended lead times, as well as minimum quantities. In addition, exceptionally large projects may also affect furniture production lead times. Feel free to contact your Virco representative – or call us at 800-448-4726 – for further information. For international sales call 310-533-0474.

ANSI/BIFMA Tested

Virco's Ultrastack®, Virtuoso®, 8900 and 8800 Series chairs; model 2018, 264517, 264617, 9018 N918, SG418, SG419, SGCANT18, ZU418 and ZCANT18 chairs; 6000, 6100 (Core-a-Gator®) and 62000 Series tables included in this catalog have passed applicable performance tests for strength, durability, and stability as established by the Business and Institutional Furniture Manufacturer's Association International and accepted by the American National Standards Institute.

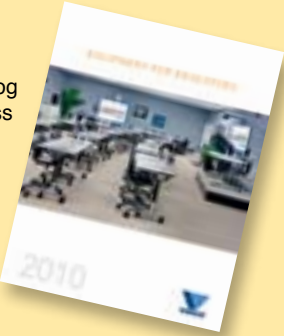

Limited Warranty

Virco warrants that it's products shall be free of all substantial defects in original material and workmanship that may become evident within ten (10) years from the date of purchase and (5) years from date of purchase on torsion bars. This limited warranty does not cover apparent defects caused by abusive or abnormal use of the product, or failures resulting from inadequate inspection and maintenance. Virco may repair or replace, at it's option, any portion of the subject product which proves to be defective under the terms of this limited warranty at no further cost to the buyer. **THERE ARE NO IMPLIED WARRANTIES OF FITNESS OR MERCHANTABILITY, AND THERE ARE NO OTHER EXPRESS WARRANTIES BEYOND THE WARRANTIES EXPRESSED HERE.** Virco shall be liable under this limited warranty only for the cost or, at its option, the repair or replacement of defective products. All incidental or consequential damages which may arise, including but not limited to business losses, personal property damage, and third party liabilities are hereby expressly excluded. Also expressly excluded under this warranty are glides, vinyl and fabric upholstery material, except as may be offered by the mill source.

Guidelines for Stacking & Moving Furniture

The number of pieces of furniture that can be safely stacked or moved on Virco's mobile storage equipment will vary depending on many factors, including the furniture's height, weight and general design; the speed at which the unit will be moved; the terrain over which it will travel; and the strength of the operator(s). Care should be taken not to stack to the point of unsteadiness. Virco recommends starting with small, easily handled loads and adding one to two pieces of furniture at a time to determine the safe capacity for each set of conditions. Use Virco mobile storage equipment with appropriate Virco furniture only.

Service Life Recommendation

In order to extend the torque life of mobile bench and stool tables with torsion bars, Virco recommends that customers store their tables in an upright position when not in use.

Care & Use Instructions

NOTICE: To prevent structural failures and possible injury, furniture should not be used other than for its intended purpose and should be inspected regularly for loose or missing screws or rivets, metal fatigue, cracks, broken welds, missing attachments, loose staples, and general instability. Furniture that is damaged or appears to be unstable should immediately be removed from service, reported to the facility manager, and replaced or repaired. Repairs should only be made using factory-authorized parts and methods. For information on furniture maintenance, or to report furniture which requires service, call Virco toll-free at 1-800-448-4726. Furniture should be wiped down with mild soap and water as needed.

GREENGUARD®

Hundreds of Virco furniture models have earned indoor air quality certification according to the stringent criteria of the GREENGUARD® Environmental Institute. When the GREENGUARD icon is shown at the bottom of a page in this catalog, products on that page are GREENGUARD certified. For the most current listing of Virco's GREENGUARD-certified products – including models that may have been certified since the publication of this catalog – go to www.greenguard.org and click on the Find Products link.

To search the Greenguard Product Guide for Virco's Greenguard-certified products, be sure to search by the series name (for example, ZUMA) or series number (for example, 3000 Series) rather than by specific model numbers (for example, ZU418 or 3018) since the search function will not recognize Virco model numbers. The Greenguard Product Guide also has printable Greenguard certificates for Virco's Greenguard-certified furniture items. Please note that these certificates refer to Virco product groups (for example, ZUMA 4-Leg Chairs, ZUMA Cantilevered Chairs, and ZUMA Mobile Chairs) rather than to specific model numbers.
